**Re: Support of Fall City Metropolitan Park District's
Efforts for Wells Site Park Land Acquisition (RCO #10-1674)**

Dear Recreation and Conservation Office,

The Fall City Community Association supports the efforts of the Fall City Metropolitan Park District to acquire land for the purposes of developing a public park and its corresponding grant application (RCO #10-1674) with the Recreation and Conservation Office.

The opportunities to develop public park recreational facilities within the Fall City area are limited due to the floodway limits of the Snoqualmie River, the forested slopes that flank the valley floor, and other environmentally sensitive areas such as wetlands and streams. In addition, continuing residential development of available lands severely limits the ability of the community to find suitable park site locations in the Fall City area.

We believe that the Wells site provides our group and the community at-large with a tremendous opportunity to create a special public park place for all. This Wells site has many attributes including its proximity to the heart of the town, its suitability as a park site, its wide open views of the surrounding hills and Cascades, and the opportunity for a future 5-acre park expansion. The generally cleared and flat 9-acre site proposed for land acquisition could be developed into residential homes by the current property owners, therefore we strongly support the efforts of the District to acquire this private land now so that it may be developed into a community park in the future.

Thank you for considering our support of this park land acquisition grant application and please feel free to contact me if you have any questions regarding this issue at 206-276-1199/

Sincerely,

Vanessa Allen, President
Fall City Community Association

RE: Support of Fall City Metropolitan Park District's Efforts for Wells Site Park Land Acquisition - RCO #10-1674

Dear Recreation and Conservation Office,

This letter is written in support of the Fall City Metropolitan Park District's efforts to acquire land for the purposes of developing a public park for the Fall City Community.

The opportunities to develop public park recreational facilities within the Fall City area are limited due to the floodway limits of the Snoqualmie River, the forested slopes that flank the valley floor, and other environmentally sensitive areas such as wetlands and streams. In addition, continuing residential development of available lands severely limits the ability of the community to find suitable park site locations in the Fall City area.

We believe that the Wells site provides our group and the community at-large with a tremendous opportunity to create a special public park place for all. This Wells site has many attributes including proximity to the heart of the town, suitability as a park site, wide open views of the surrounding hills and Cascades, a willing seller and the opportunity for a future 5-acre park expansion. The generally cleared and flat 9-acre site proposed for land acquisition could be developed into residential homes by the current property owners, therefore we strongly support the efforts of the District to acquire this private land now so that it may be developed into a community park in the future.

Thank you for considering our support of this park land acquisition grant application and please feel free to contact us if you have any questions.

Sincerely,

Jennifer Harrison-Cox

**Re: Support of Fall City Metropolitan Park District's
Efforts for Wells Site Park Land Acquisition (RCO #10-1674)**

Dear Recreation and Conservation Office,

The Falls Little League supports the efforts of the Fall City Metropolitan Park District to acquire land for the purposes of developing a public park and its corresponding grant application (RCO #10-1674) with the Recreation and Conservation Office.

We are subjected to having to use poorly maintained school fields, and due to the lack of school district funding, we have to maintain and improve those fields with our non profit funding ourselves to make them safe for the children. Additionally, on a weekly basis, we have to send hundreds of kids, multiple times per week, to neighboring cities to use their ballparks. This puts a tremendous burden on the parents who have to drive the children, as well as increasing traffic on the roadway and pollutants in the air.

We believe that the Wells site provides our group, and the community at-large, with a tremendous opportunity to create a special public park place for all. This Wells site has many attributes including its proximity to the heart of the town, its suitability as a park site, its wide open views of the surrounding hills and Cascades, and the opportunity for a future 5-acre park expansion. The generally cleared and flat 9-acre site proposed for land acquisition could be developed into residential homes by the current property owners, therefore we strongly support the efforts of the District to acquire this private land now so that it may be developed into a community park in the future.

Thank you for considering our support of this park land acquisition grant application and please feel free to contact us if you have any questions regarding this issue.

Sincerely,

Terri Campbell, Vice President
Falls Little League

**Re: Support of Fall City Metropolitan Park District's
Efforts for Wells Site Park Land Acquisition (RCO #10-1674)**

Dear Recreation and Conservation Office,

The Raging River Riders (RRR), has been a non profit Saddle Club since 1964. We are active in community events including, Fall City Days Parades, highway litter pickup, and helping to stock local food banks. As a family oriented club we support the efforts of the Fall City Metropolitan Park District to acquire land for the purposes of developing a public park and its corresponding grant application (RCO #10-1674) with the Recreation and Conservation Office.

The opportunities to develop public park recreational facilities within the Fall City area are limited due to the floodway limits of the Snoqualmie River, the forested slopes that flank the valley floor, and other environmentally sensitive areas such as wetlands and streams. In addition, continuing residential development of available lands severely limits the ability of the community to find suitable park site locations in the Fall City area.

We believe that the Wells site provides our group and the community at-large with a tremendous opportunity to create a special public park place for all. This Wells site has many attributes including its proximity to the heart of the town, its suitability as a park site, its wide open views of the surrounding hills and Cascades, and the opportunity for a future 5-acre park expansion. The generally cleared and flat 9-acre site proposed for land acquisition could be developed into residential homes by the current property owners, therefore we strongly support the efforts of the District to acquire this private land now so that it may be developed into a community park in the future.

Thank you for considering our support of this park land acquisition grant application and please

feel free to contact us if you have any questions regarding this issue.
